

Simplicity. Safety. Success.

QIAGEN[®] EZ1[®] Advanced XL

Just imagine. Simpler. Safer. Results with more confidence.

Imagine with just the touch of your finger, you could be getting consistent high-quality DNA and RNA in only 20 minutes. Imagine if you had more time to think about your next great research idea.

At QIAGEN, we strive to make this possible with our automation solutions and optimized chemistries. The EZ1 Advanced XL can be effortlessly integrated into your daily work to help you convert biological samples into valuable molecular insights.

Whether you are in biomedical research, drug or biologic therapeutics, or a commercial testing lab, our automated Sample to Insight® solutions deliver the reproducible, high-quality data that you strive to achieve.

Benefits of the EZ1 Advanced XL System include:

- Fastest turnaround time on the market, process 1–14 samples yielding pure DNA and RNA from various samples, including bacteria and pathogens
- Track samples, reagents and assays with bar code reading; export results to your LIMS
- No previous experience needed; training literally takes minutes
- Provides safety protection for technicians and samples
